SKILLS

- **Languages:** Python, Java, C++
- **Frameworks:** React, NodeJS, ExpressJS, CSS, HTML
- **Database:** MySQL, MongoDB
- **Tools/Platforms:** Git, GitHub, AWS, Docker, Vercel
- **Soft Skills:** Problem-Solving, Adaptability, Creativity

PROJECTS

Markdown Blog Platform | [GitHub](#) | [Live](#)

Feb 2026

- Developed a full-stack blogging platform using MERN Stack featuring a real-time Markdown editor and secure JWT-based authentication with protected REST APIs.
- Implemented Multer for handling file uploads and integrated pdf-parse to convert PDFs into Markdown posts, while using cloudinary for optimized image hosting and delivery.
- Integrated Recharts to build an analytics dashboard that tracks post views, top content, and category distribution and deployment done on vercel with MongoDB Atlas, ensuring scalability and seamless public access.
- **Tech Stack** | React, Node.js, Express.js, MongoDB, Bcrypt, Recharts, Multer, Cloudinary, Git

Exam Paper Generator | [GitHub](#) | [Live](#)

Nov 2025

- Designed a role-based exam paper generator with MERN, incorporating JWT authentication and access control for Admin, Teacher, and Student users.
- Constructed structured prompts with Mistral 7B via Open Router API to generate validate MCQs and added server-side auto-grading for instant evaluation of submissions.
- Leveraged pdfkit to produce downloadable exam papers and configured environment-based deployment pipelines, ensuring secure integration with cloud services and smooth scalability.
- **Tech Stack** | Node.js, Express.js, React, JavaScript, pdfkit, MongoDB, Mistral 7B(API), Bcrypt, Git

Real-Time Sports Scoreboard | [GitHub](#)

Apr 2025

- Crafted a dynamic sports scoreboard website with HTML, JavaScript, presenting real-time scores and match updates for cricket, football and other multiple sports.
- Orchestrated backend operations using PHP and MySQL to manage data efficiently and maintain smooth server-side performance.
- Harnessed RapidAPI to pull live match information and deliver instant updates, while maintaining project reliability and collaboration through Git.
- **Tech Stack** | JavaScript, HTML, CSS, PHP, MySQL, Git

TRAINING

Data Structure and Algorithm Using Python | [CSE Pathshal](#)

Jun 2025 – Jul 2025

- Completed a 6-week training program focused on both core and advanced DSA concepts covering arrays, OOPs, linked lists, STL, trees, heaps, graph, and dynamic programming.
- Tackled coding challenges on platform like LeetCode and HackerRank, sharpening problem-solving ability, algorithmic thinking, and efficiency in time and space complexity.
- Applied and demonstrated knowledge of searching, sorting, graph traversal, and dynamic programming through hands-on coding assessments designed to simulate real interview environment.

CERTIFICATES

- OCI 2025 Certified AI Foundations Associate | [Oracle](#) Mar 2026
- Privacy And Security In Social Media | [NPTEL](#) Nov 2025
- Master Generative AI & Generative AI tools | [Udemy](#) Aug 2025
- Responsive Web Design | [Free Code Camp](#) Oct 2023

EDUCATION

[Lovely Professional University](#)

Bachelor of Technology | Computer Science and Engineering; CGPA: 7.19

Phagwara, Punjab

Aug 2023 – Present

[Army Public School](#)

Intermediate; Percentage: 71

Ambala Cantt, Haryana

Apr 2022 – Mar 2023

[Army Public School](#)

Matriculation; Percentage: 88

Ambala Cantt, Haryana

Apr 2020 – Mar 2021
