SKILLS

- **Languages:** Python, Java, C++
- **Frameworks:** HTML and CSS, NodeJS, React
- **Database:** MySQL, MongoDB
- **Tools/Platforms:** Git, Visual Studio Code
- **Soft Skills:** Problem-Solving, Adaptability, Creativity

PROJECTS

Markdown Blog Platform | [GitHub](#)

Feb' 26

- Built a blogging platform that allows users to write, edit, and publish blogs using Markdown, along with options to add categories, tags, cover images, and publish status.
- Used the MongoDB, Express.js, React, and Node.js (MERN stack) to manage blog data, user authentication, and smooth communication between the frontend, backend, and database.
- Added a PDF upload feature that converts uploaded documents into editable blog content, enabling users to quickly transform their PDFs into blog posts and reduce manual writing effort.
- Implemented a split-screen Markdown editor with real-time preview, allowing users to write blog content on one side and instantly see the formatted output on the other side.

Exam Paper Generator | [GitHub](#)

Nov' 25

- Built an exam management system that allows teachers to create question banks, generate exam papers, and assign exams to students through a structured workflow.
- Used the MERN stack to manage questions, exam templates, user roles, student attempts, and results, ensuring smooth interaction between the frontend, backend, and database.
- Added an AI-based question generation feature that creates multiple-choice questions automatically based on subject, topic, and difficulty, helping reduce manual work for teachers.
- Implemented auto-grading and instant result display, along with separate dashboards for Admin, Teacher, and Student to improve usability and system organization.

Real-Time Sports Scoreboard | [GitHub](#)

Apr' 25

- Developed a real-time sports scoreboard website that shows live scores and match updates for cricket, football, and several other sports, making it easy for users to follow ongoing games.
- Used HTML, CSS, and JavaScript to build a clean and responsive front-end interface, while handling backend functionality with PHP and MySQL to manage data and ensure smooth performance.
- Connected the application to Rapid API to fetch live match data and display real-time updates, creating an engaging and reliable score-viewing experience for users.

TRAINING

Data Structure And Algorithm Using Python | [CSE Pathshal](#)

June' 25 – July' 25

- Learned core DSA concepts in Python, including lists, sets, and searching techniques.
- Improved understanding of algorithmic thinking and efficient data handling.
- Built skills in writing clean, structured, and optimized Python code using OOP principles.

CERTIFICATES

Privacy And Security In Social Media | [NPTEL](#)

Nov' 25

Master Generative AI & Generative AI tools | [Udemy](#)

Aug' 25

Responsive Web Design | [Free Code Camp](#)

Oct' 23

EDUCATION

[Lovely Professional University](#)

Punjab, India

Bachelor of Technology | Computer Science and Engineering; CGPA: 6.79

Since Aug' 23

[Army Public School](#)

Intermediate; Percentage: 71

Ambala Cantt, Haryana

Apr'22 – mar'23

[Army Public School](#)

Matriculation; Percentage: 88

Ambala Cantt, Haryana

Apr'20 – Mar' 21
